# Focus

Project presentation

Focus is an mobile app for cultivating concentration.
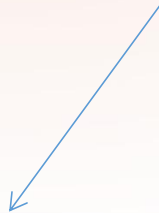

What's this ?

Focus

Information Bang

People's Attention Resource

Scarce Resource

More and more apps are dividing your focus, but we want you to stay focused.

Focus is an app for cultivating concentration. We hope to cultivate people's good habit of putting down their mobile phones and focusing on doing things by means of motivation.

Inspiration

In the process of communicating with team members, I found that everyone has such distress.

We also manage own lives using calendar tools, but always interrupt for various reasons.

We designed it — the Focus APP, hoping to encourage everyone to stay focused behavior through a reward

mechanism, and incorporated the concept of soul–bound tokens to record the user's on–chain identity

and bind it permanently.

You can show it to your friends and tell everyone what good habits you keep with Focus APP.

These records will always track your behavioral characteristics, enrich your on–chain information profile,

and become part of your identity.

Our goal is to welcome new users to WEB3 and inspire them to explore all the exciting things it has to offer!

Focus

How we build it ?

Focus

We

Challenge

We need to build the SBT contracts on solana, because the nft contracts of solana cannot meet our needs for the time being.

We need to design the economic system of NFT and integrate it with tokens to achieve a state of both economic incentives and interesting incentives.

We need to complete product development on the APP rather than the WEB side, which is a new challenge for us who often use the web to develop dapps.

Elements

Focus

Plants types

There are a lot of plant types, which are gradually released as the user grows.

Earning

Completing tasks will be fun. You might get great rewards, but you might get nothing.

Markets

Provide markets to trade, buy what you need.

Collecting

If you are very fond of collecting, this collection is just for you.

Recording

What do I spend my time on every day?
We will provide a complete data analysis service, you can find the answer here.

Box

Users can hold up to 3 Boxes, Countdown starts when users receive Box, and users can open it when the countdown reaches 0.
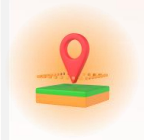

Tokenomics

Focus

Game Token

FOT is a token used in the game. Users can earn tokens by completed tasks, use it to trade NFTs.
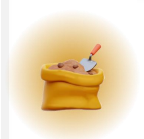

Governance Token

FMT is a governance token of Focus APP .Users can participate in decision–making in DAO.

NFT–land

Land NFT is our main NFT but is not tradable,anyone can pay for mint land.

NFT

Decorations and other NFTs can be traded, except for plants.

Wallet

Use the Phantom wallet for the app,so users can easily join up.

Users can easily buy and sell NFTs in the market.

Why adopt the solana chain ?

Focus

Low cost
Solana's scalability ensures transactions remain less than $0.01 for both developers and users.

Fast

Solana is all about speed, with 400 millisecond block times. And as hardware gets faster,

so does the network.

Decentralized and secure
Not only is Solana ultra–fast and low cost, it is censorship resistant.

Scale for global adoption
Integrate once and never worry about scaling again.

Solana is the fastest blockchain in the world and the fastest growing ecosystem in crypto.
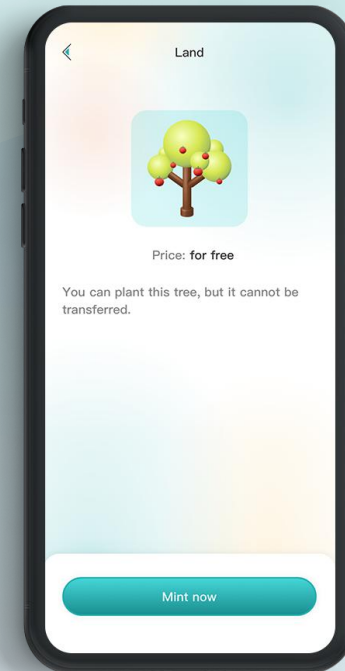

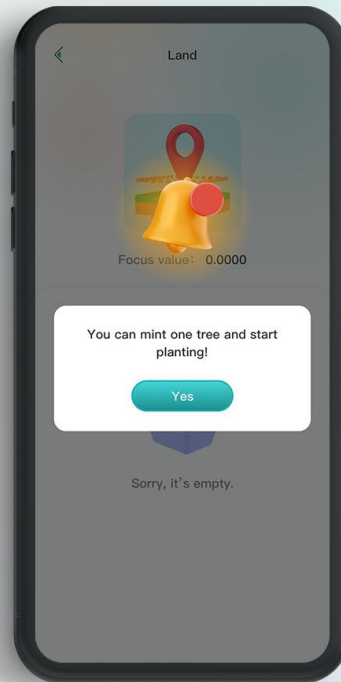

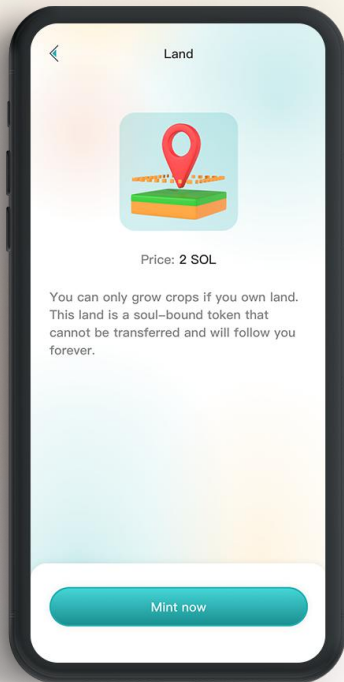

Demo display

Focus

1. Users can call phantom APP to log–in the Focus APP.

2. You can click the start button to recording your own tasks at any time.

3. You can get rewards after completing tasks.

Demo display

Focus

Land

Price: **2 SOL**

You can only grow crops if you own land. This land is a soul-bound token that cannot be transferred and will follow you forever.

Mint now

Land

Focus value: 0.0000

You can mint one tree and start planting!

Yes

Sorry, it's empty.

Land

Price: **for free**

You can plant this tree, but it cannot be transferred.

Mint now

1.Plants can be grown after mint LAND.

2.After planting plants, you will get growth value every time you complete the task, and the plants will mature when the growth value reaches the upper limit. You can get rewards after completing tasks.

3.Mature plants will drop boxes with random rewards.

Team members

Focus

Yaffa
Product Designer

Conceptualize original ideas that bring simplicity and user friendliness to complex design roadblocks
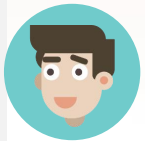

DDragon
UI Designer

Collaborate with product designer and engineering to define and implement innovative solutions for the product visuals, and experience.

Andy
Smart Contracts Engineer

Research and develop protocol upgrades and new NFT contracts. Implement Solana programs and instructions with a focus on security, simplicity and ease of use.

Zhonghai
Mobile Engineer (Android)

Directly work on the implementation and development of our native Android mobile application.Ensure code quality and software reliability through automated test implementations, UI/UX testing, and processes.

Thanks for watching!
